INDEX FOR VOLUME 21

AUTHOR

Abelson, Robert P. (with S. J. Messick). The additive constant problem in multidimensional scaling. 1-15.

Angoff, William H. A note on the estimation of nonspurious correlation. 295-297.

Bennett, Joseph F. Determination of the number of independent parameters of a score matrix from the examination of rank orders. 383-393.

Bock, R. Darrell. The selection of judges for preference testing. 349-366.

Cartwright, Desmond S. A rapid non-parametric estimate of multi-judge reliability. 17-29.

Coombs, Clyde H. The scale grid: some interrelations of data models. 313-329.

Cureton, Edward E. Review of "Quinn McNemar, *Psychological Statistics* (Second Edition)." 93-94.

Cureton, Edward E. Rank-biserial correlation. 287-290.

Deuel, P. D. A nomogram for factor analysts. 291-294.

Dodd, Stuart Carter. Testing message diffusion in harmonic logistic curves. 191-205.

Feller, William. Review of "I. Blumen et al., *The Industrial Mobility of Labor as a Probability Process.*" 217.

Fishman, Joshua A. A note on Jenkins' "Improved method for tetrachoric *r*." 305.

Garner, W. R. (with W. J. McGill). The relation between information and variance analyses. 219-228.

Garside, R. F. The regression of gains upon initial scores. 67-77.

Gibson, W. A. Proportional profiles and latent structure. 135-144.

Gilbert, E. J. The matching problem. 253-266.

Green, Bert F. A method of scalogram analysis using summary statistics. 79-88.

Gulliksen, Harold. A least squares solution for paired comparisons with incomplete data. 125-134.

Gulliksen, Harold. Measurement of subjective values. 229-244.

Gulliksen, Harold. A tribute to L. L. Thurstone. 309-312.

Guttman, Louis. "Best possible" systematic estimates of communalities. 273-285.

Harris, C. W. Relationships between two systems of factor analysis. 185-190.

Horst, Paul. Optimal test length for maximum differential prediction. 51-66.

Horst, Paul (with Charlotte MacEwan). Optimum test length for maximum absolute prediction. 111-124.

Householder, A. S. Review of *Mathematical Models of Human Behavior, A Symposium.* 307-308.

Jones, Lyle V. (with W. W. Rozeboom). The validity of the successive intervals method of psychometric scaling. 165-183.

Kaiser, Henry F. Note on Carroll's analytic simple structure. 89-92.

Katz, Leo (with T. R. Wilson). The variance of the number of mutual choices in sociometry. 299-304.

Lev, Joseph. Maximizing test battery prediction when the weights are required to be non-negative. 245-252.

Lord, Frederic M. A study of speed factors in tests and academic grades. 31-50.

Luce, R. Duncan. Review of *Decision Processes*, R. M. Thrall et al. (Eds.). 96-98.

MacEwan, Charlotte (with Paul Horst). Optimum test length for maximum absolute prediction. 111-124.

McGill, William J. (with W. R. Garner). The relation between information and variance analyses. 219-228.

McHugh, Richard B. Efficient estimation and local identification in latent class analysis. 331-347.

Messick, Samuel J. An empirical evaluation of multidimensional successive intervals. 367-375.

Messick, Samuel J. (with R. P. Abelson). The additive constant problem in multidimensional scaling. 1-15.

Milholland, John E. Review of "R. L. Thorndike and Elizabeth Hagen, *Measurement and Evaluation in Psychology and Education.*" 94-95.

Rosner, Burton S. A new scaling technique for absolute judgments. 377-381.

Rozeboom, William W. (with L. V. Jones). The validity of the successive intervals method of psychometric scaling. 165-183.

Siegel, Sidney. A method for obtaining an ordered metric scale. 207-216.

Simon, Herbert A. A comparison of game theory and learning theory. 267-272.

Thorndike, Robert L. Review of "Paul E. Meehl, *Clinical and Statistical Prediction.*" 218.

Torgerson, Warren S. A non-parametric test of correlation using rank orders within subgroups. 145-152.

Webster, Harold. Maximizing test validity by item selection. 153-164.

Wilson, Thurlow R. (with L. Katz). The variance of the number of mutual choices in sociometry. 299-304.
